Volume 5 of *Emergence* marks a special time for us. This will be our last year with Lawrence Erlbaum Associates. LEA has been a good friend to the journal during our first five years, but the time has come for us to move on. As this issue goes to print we are in the midst of working out the details for our sixth year. It appears that we will be changing our name to *Emergence, Complexity and Organizations* and adding two new sponsoring organizations: the Complexity Society of the UK and the Cynnefin Center of IBM and the University of Cardiff.

We hope that we will be returning to both print and an online format as well. The next issue will contain more news.
